

MASTER FARMER SEED RELABELING "ALSO SOLD AS" VARIETIES

By cross matching Variety Names from thousands of seeds, *FBN* is able to identify which varieties are sold under multiple brand names, often for very different prices. When a seed is identified as "Also Sold As," that means its Variety Name matches those of other seeds. The Variety Name identifies a seed's base genetics and trait package. Seeds with matching Variety Names can have different seed treatments if pre-treated. Below is the list of matched Variety Names within the Master Farmer traited seed brand, available through the *F2F Genetics Network*.

MF BRAND	BRANDS SELLING THE SAME VARIETY	ACRES OF VARIETY IN FBN SEED FINDER, ACROSS ALL BRANDS	AVERAGE YIELD OF VARIETY IN FBN SEED FINDER, ACROSS ALL BRANDS
